**ADVANCED CONCRETE TECHNOLOGIES BREAKS GROUND ON NEW  
CORPORATE HEADQUARTERS**

**Portsmouth, NH** - Advanced Concrete Technologies, Inc., (A.C.T.) the North American leader in supplying turnkey concrete production plant and equipment solutions, recently celebrated the ground breaking on its new corporate headquarters in Greenland, New Hampshire. The new facility will serve as the North American hub for all customer service, technical support and parts warehousing operations, as well as corporate offices for key management, administrative, sales, and technical support staff.

“This state-of-the-art building was a long time coming,” stated A.C.T. president, E. Max Hoene. “Once completed, we will have plenty of room for not only support staff, but for meeting facilities and an extensive spare parts inventory for overnight delivery to support our strong growth.” The company’s current offices are located at Pease International Tradeport, just outside Portsmouth, New Hampshire.

Advanced Concrete Technologies, Inc., the American division of two major German equipment manufacturers Wiggert + Co. and Würschum GmbH, is a single source supplier of turnkey concrete mixing, batching, and automatic color metering systems that draws on over 40 years of experience and more than 4,000 installations worldwide. This year, the company marks a milestone with the installation of its 1,000<sup>th</sup> HPGM series countercurrent mixer. The company’s equipment and plant designs are renowned for producing superior quality concrete in applications that require extreme consistency from batch to batch. The firm’s plants are designed to provide reliable, efficient, and safe operation with maximum flexibility allowing concrete product producers to be up and running faster, and with greater profitability. Construction on the new facility will be

completed during the first quarter of 2007 with the company planning it's completed move by March.
