KLEINMANN joins Advanced Concrete Technologies as Sales Engineer

GREENLAND, NH – Ralph Kleinmann has recently been hired by Advanced Concrete Technologies (ACT), as Sales Engineer. Ralph joined a growing team at ACT and is responsible for sales and successful installation of Wiggert mixers, Wurschum color stations, plant components and complete mixing/batching plants. He has contributed to ACT's success over the past year being directly responsible for several new projects as ACT continues to extend its market share.

Ralph earned his Bachelor of Science in Civil Engineering from Drexel University with a concentration on Structural Design and Construction Management. Ralph's career spans various technical, consulting and management roles, in customer-focused environments. He also brings an accomplished background in sales and account project management to ACT. He joins an ACT team that is committed to customer satisfaction and delivering value to the customer's business.

ACT, the American division of two major German equipment manufacturers, Wiggert + Co, and Wurschum GmbH, is a single source supplier of turnkey concrete mixing, batching, and automatic color metering systems that draws on over 45 years of experience and more than 4,500 installations worldwide. The company's equipment and plant designs are renowned for producing superior quality concrete in applications that require extreme consistency from batch to batch. The firm's plants are designed to provide reliable, efficient, and safe operation with maximum flexibility allowing concrete producers to be up and running faster, and with greater profitability.
