Advanced Concrete Technologies hires Greg Stevens as Sales Engineer

GREENLAND, NH – Advanced Concrete Technologies (ACT) announces the hiring of Greg Stevens as Sales Engineer. Greg joins a growing team at ACT and is responsible for sales and successful installation of Wiggert mixers, Wurschum color stations, plant components and complete mixing/batching plants. He is responsible for the Central and Mid-West United States region for ACT.

Greg earned his Bachelor and Masters Degree in Chemical Engineering from Northeastern University in Boston, Massachusetts. He has over ten years experience in the capital equipment industry and brings an accomplished background in sales and account project management to ACT. “Greg has a wealth of experience in providing and supporting integrated reliable solutions. I am delighted to have him join ACT and know he will be an invaluable asset in rounding out our team of top notch sales engineers” said Max Hoene, President of ACT. He joins an ACT team that is committed to customer satisfaction and delivering value to the customer’s business.

Advanced Concrete Technologies is a single source supplier of turnkey concrete mixing & batching plants that draws on over 45 years of experience and more than 4,000 installations worldwide. Our turnkey plants are up and running quicker, and reliably producing consistent, superior quality concrete, batch to batch. In addition to our MobilMat turnkey batching & mixing plants, we provide the industry’s most advanced countercurrent & twin shaft mixers, and color metering, admixture, microwave water metering, flying bucket delivery, automatic mixer cleaning and computer control systems.
